Home Assignment:

Implement the user story ingestion process by following the same approach used for test cases. Read the user story Excel file from the "src/data" folder, ingest the data into MongoDB, and create the user story vector index using the "user- stories-vector-index.json" configuration file available in the "src/config" folder.

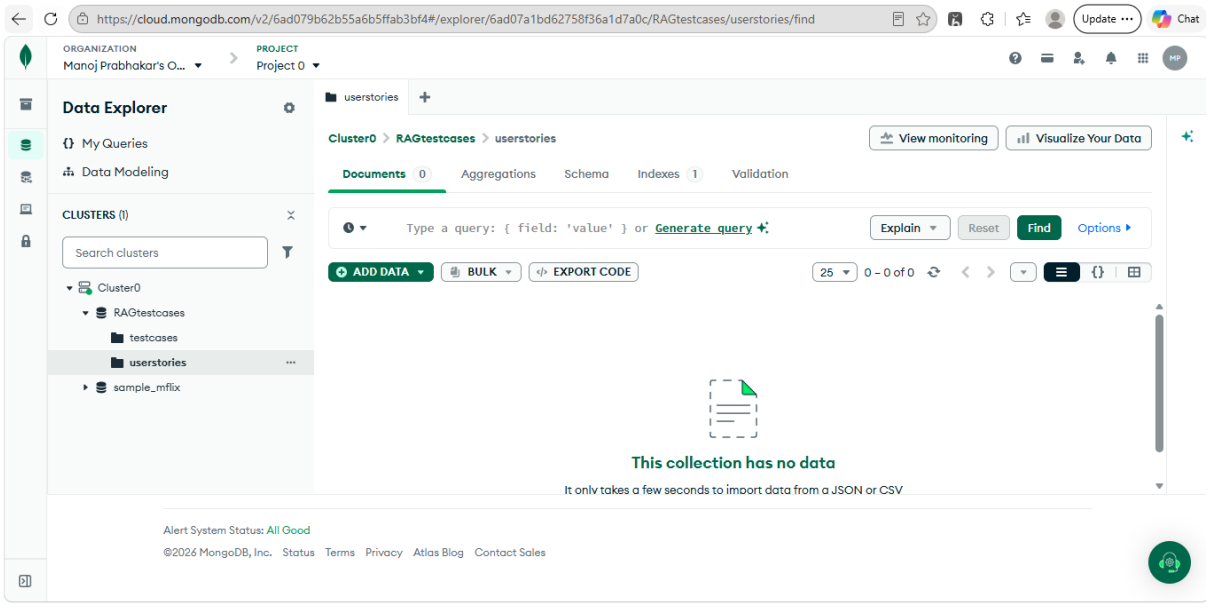

190 User stories added to Mongo DB.

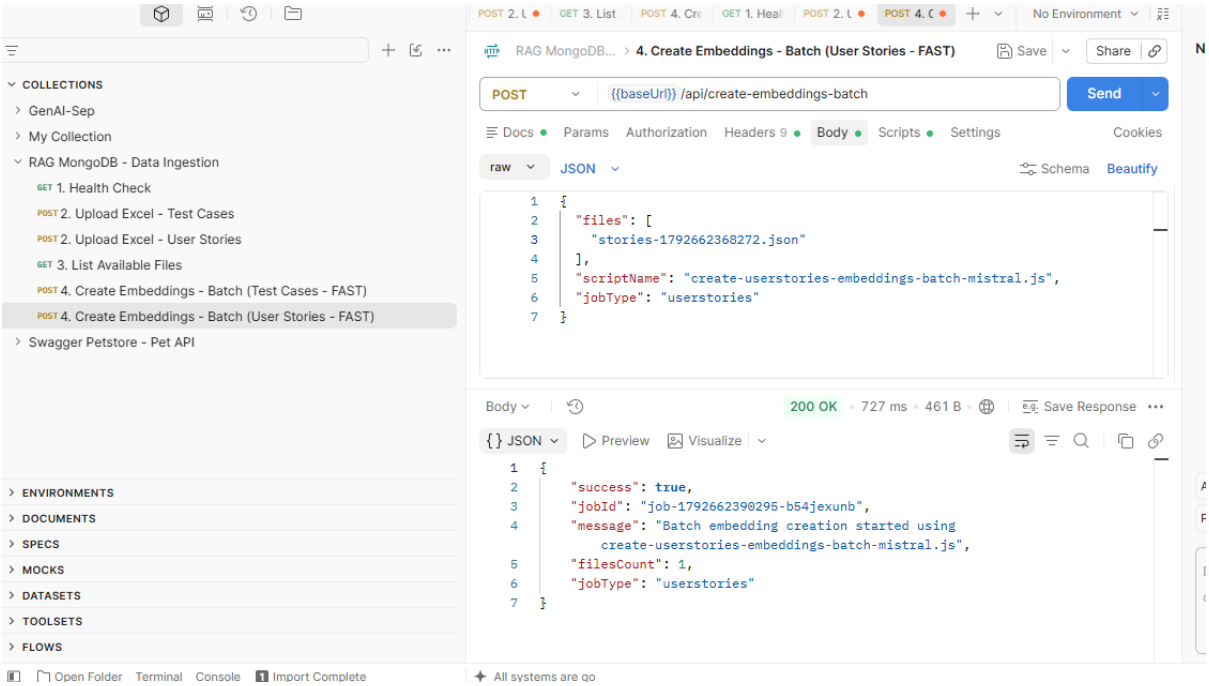

Deleting the User stories:

```
mo-backend> node src/scripts/utilities/delete-all-documents.js
Deleted 190 documents from userstories
PS D:\Gen AI course - TestLeaf\genai-assignments\phase-2\week-3\day-2\rag-mongo-de
mo-backend>
```

Re-injecting using Postman api:

```
Problems  Output  Debug Console  Terminal  Ports                                   node

PS D:\Gen AI course - TestLeaf\genai-assignments\phase-2\week-3\day-2\rag-mongo-de
mo-backend> npm run dev

[userstories] 📊 Progress: 190/190 (100.0%) | Rate: 30.9/sec | ETA: 0s | Cost: $0.
