Homework Assignment: Jira Integration

You already have the existing application with *ingestion, retrieval, MongoDB, frontend, and test case generation* functionality.

For this assignment, extend the existing application by integrating *Jira*.

Requirements

* [ ] Integrate *Jira* with the existing application.

* [ ] Fetch the *user story from Jira*.

* [ ] Ingest the fetched user story into *MongoDB*.

* [ ] Retrieve the existing/relevant context from MongoDB.

* [ ] Use the Jira user story along with the retrieved context to *generate test cases* using the existing functionality.

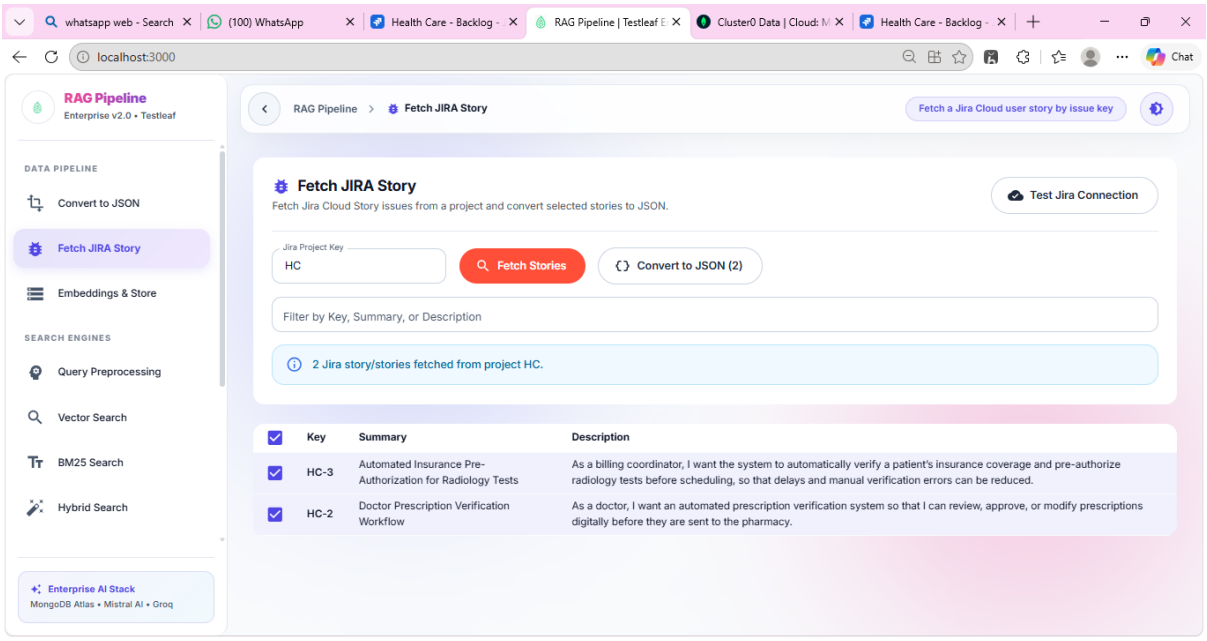

* [ ] Display the generated test cases in the frontend.

Expected Flow

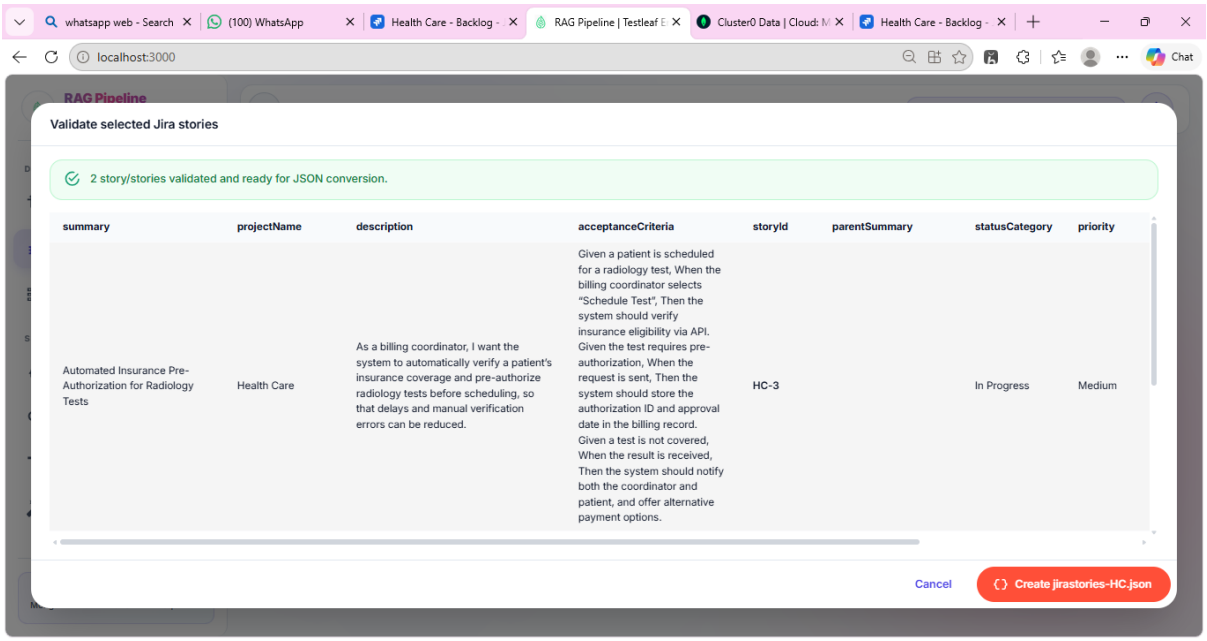

Jira → Fetch User Story → Ingest into MongoDB → Retrieve Existing Context → Generate Test Cases → Display Results

Note: You do not need to rebuild the existing ingestion, retrieval, or test case generation functionality. Focus on the *Jira integration and connecting it with the existing flow*.Fetched

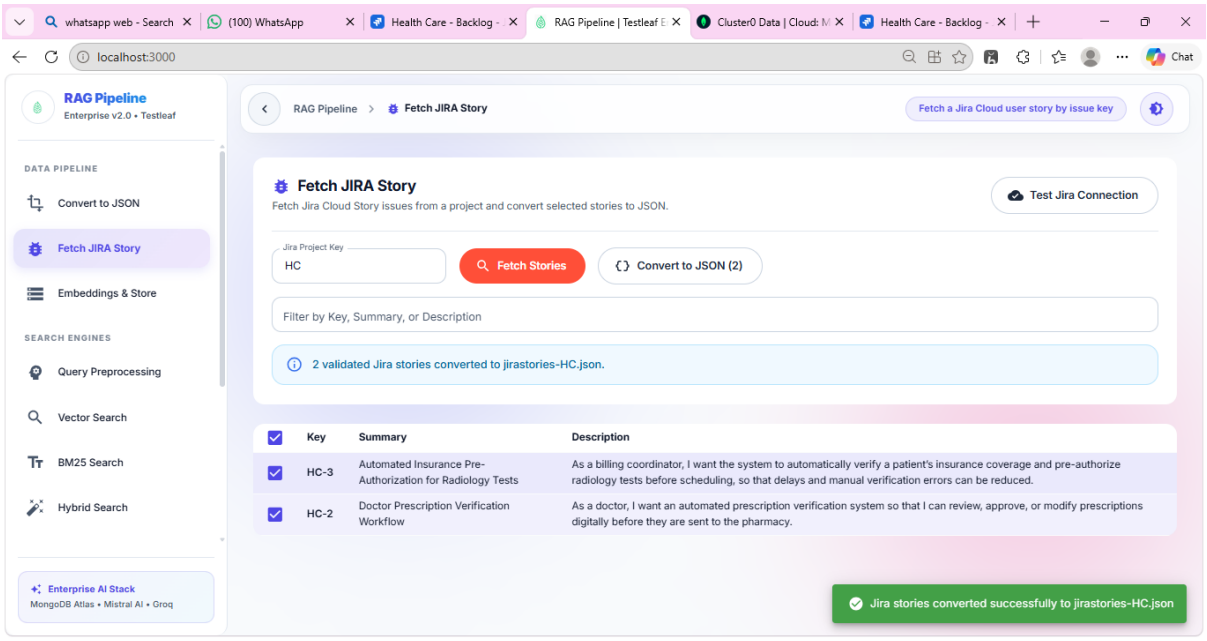

User stories from JIRA:

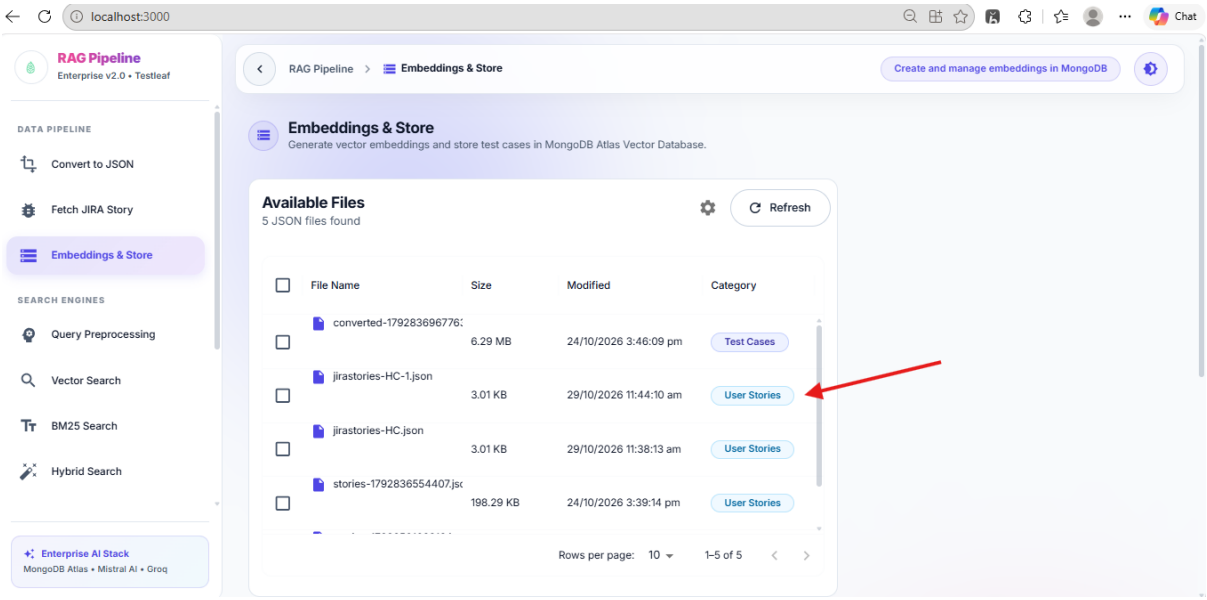

Placed an preview pane before converting it to json file.

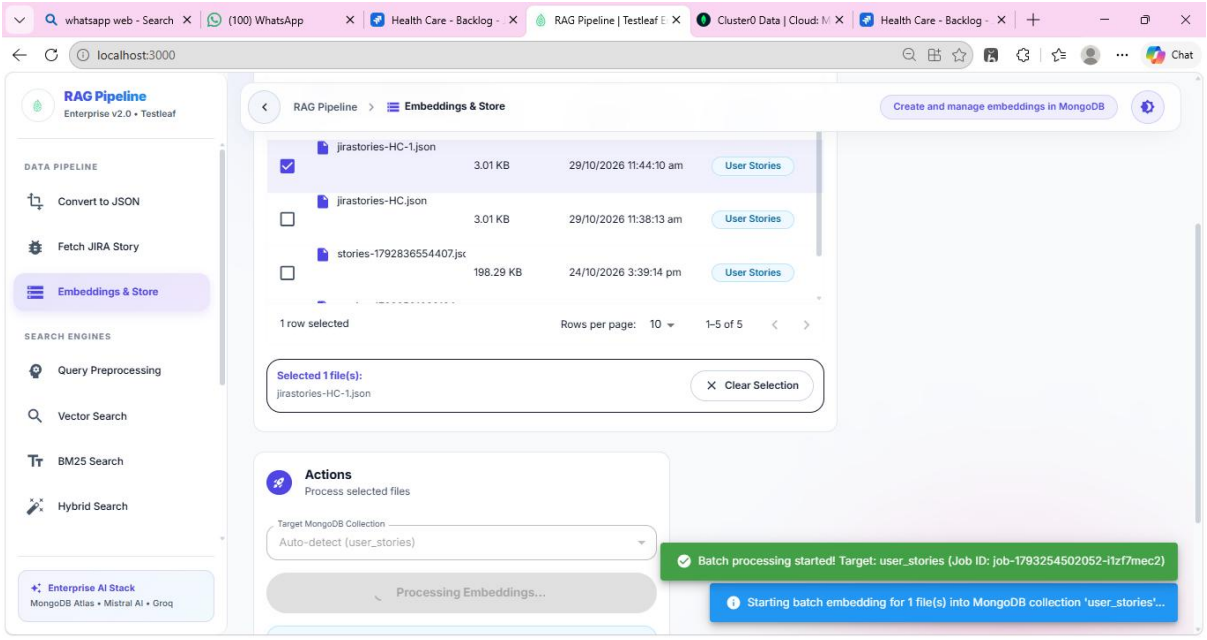

Converted to json successfully.

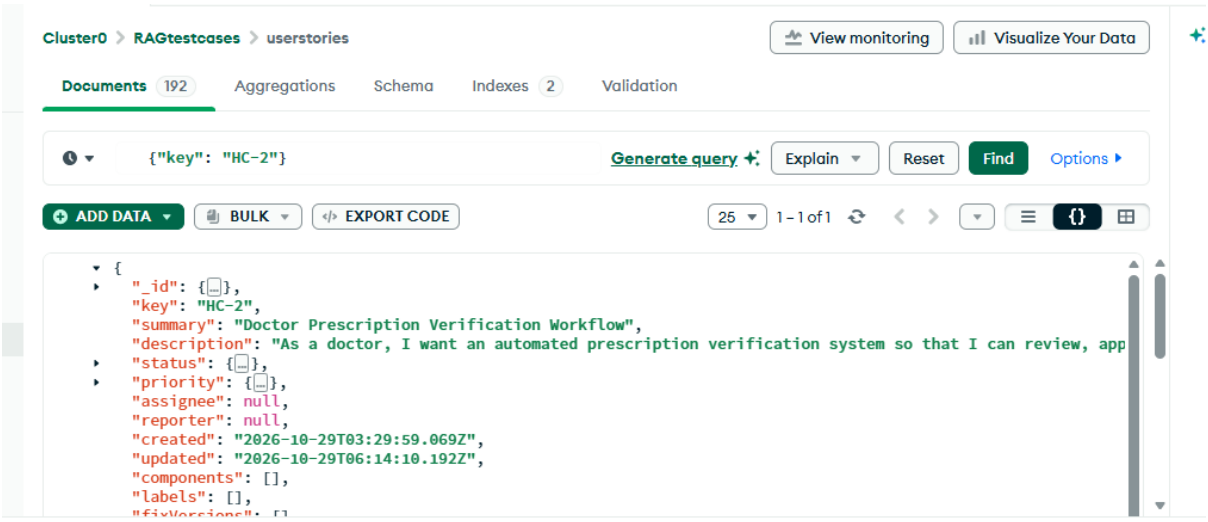

File added to Embeddings and Store section

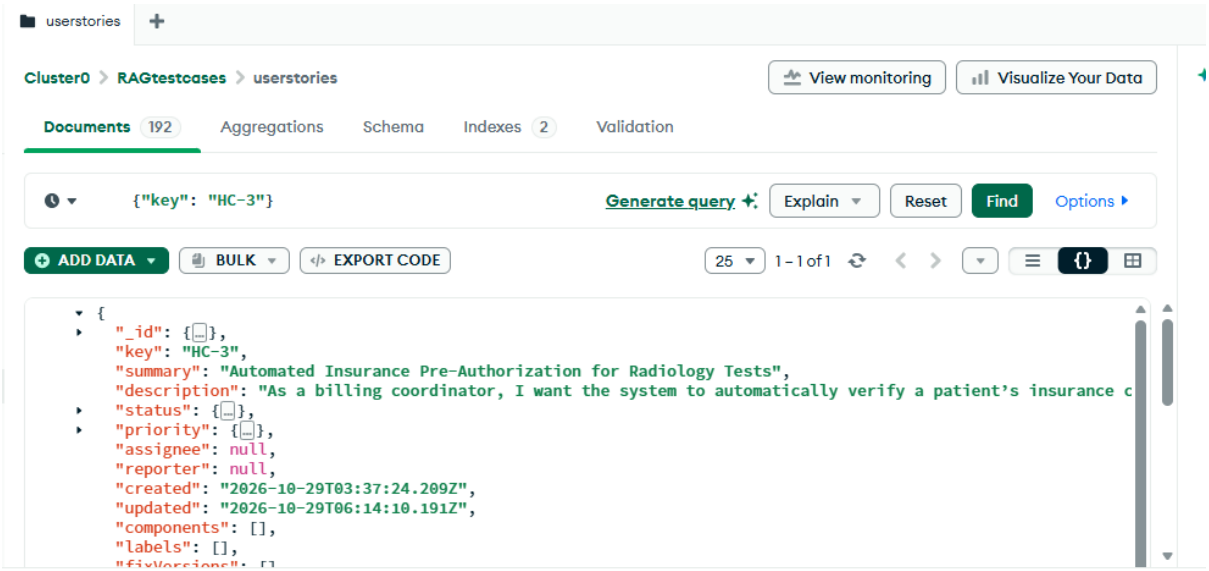

File ingested to Mongo DB:

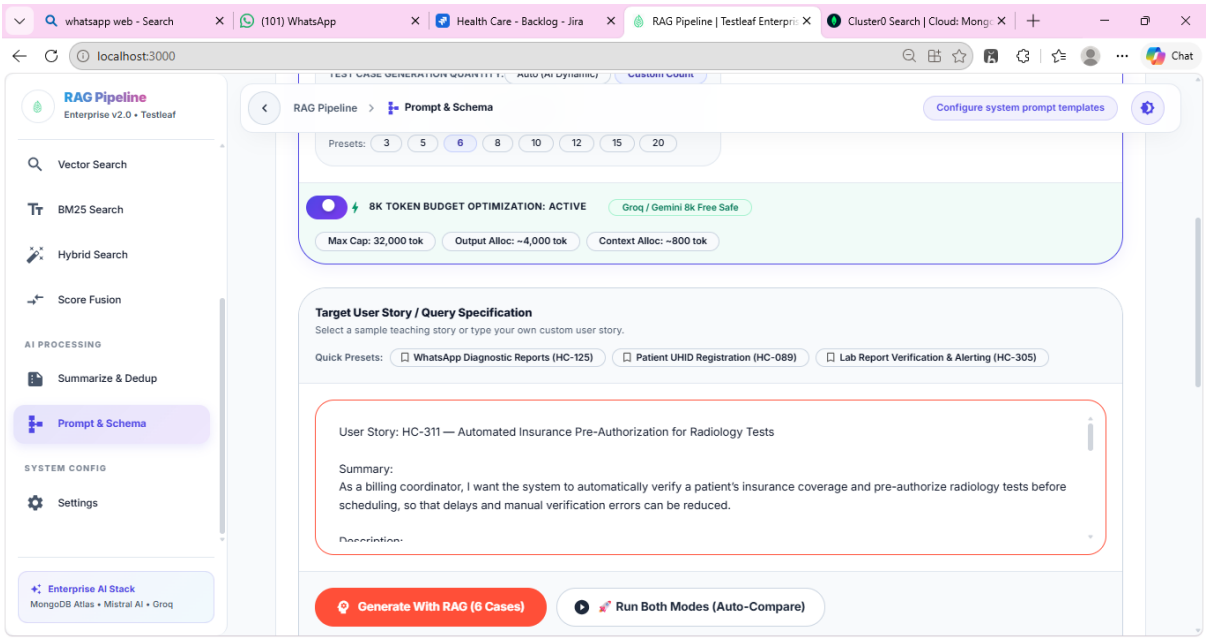

User stories are now available in Mongo DB:

Given the same user story to generate the test cases

TC’s generated
