

Home Assignment

Phase-2 Week 5

Day - 1 Assignment 1:

Explored N8N case studies for following

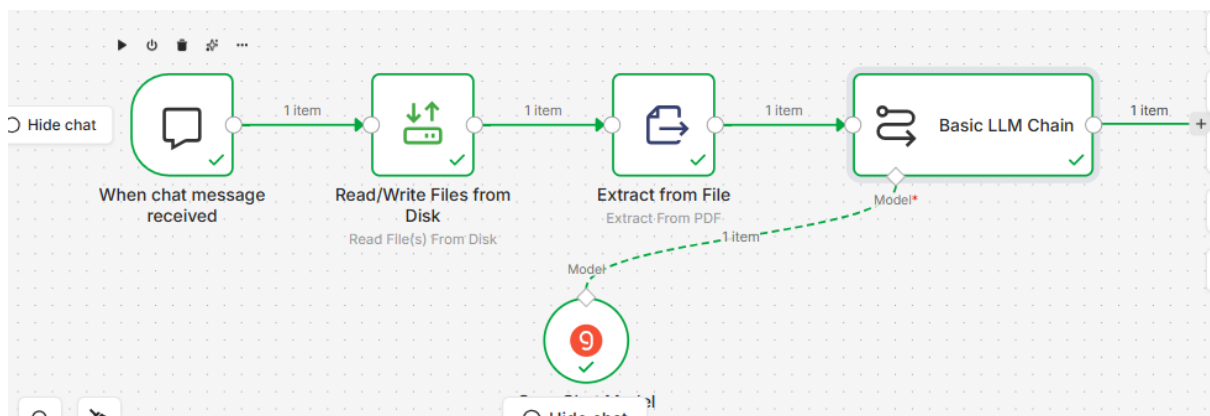

1. Vodafone

Day – 1 Assignment 2:

Templates Practice:

1. Generate AI viral video through with VEO 3 (Not able to complete this. But tried to use some of the components and understood it behaviour.

Day-2 Home Assignment:

Manual Trigger: Chat Trigger

Read/Write Files from Disk: Stored the file to be read

Extract from File: extracts content from the file uploaded

Basic LLM: Prompt provided to answer for the question asked only from the extracted content of the file uploaded with "Groq chat model – openai/gpt-oss-120b" support.

Chat:

The screenshot shows the n8n web interface for configuring a 'When chat message received' node. The browser's address bar displays 'localhost:5678/workflow/KhJDXbrxvpiDw457/9328cf'. The interface is divided into three main sections: Parameters, Settings, and Output.

- Parameters:** Includes a toggle for 'Make Chat Publicly Available' (currently off) and an 'Options' section with an 'Add Field' button.
- Settings:** Contains an 'Open chat' button.
- Output:** Displays a table with one item. The table has three columns: 'action' (sendMessage), 'sessionId' (6e9687eb946d401cb181dc881ebd8a7b), and 'chatinput' (Get me the room rent charges of this policy).

Health Insurance Policy uploaded

The screenshot shows the n8n web interface for configuring a workflow. The browser's address bar displays 'localhost:5678/workflow/KhJDXbrxvpiDw457/156a65'. The workflow consists of two nodes: 'When chat message received' and 'Read/Write Files from Disk'.

- When chat message received:** This node is configured with the same parameters as in the first screenshot. Its output is connected to the 'Read/Write Files from Disk' node.
- Read/Write Files from Disk:** This node is configured with the following settings:
 - Operation:** Read File(s) From Disk
 - File(s) Selector:** C:\Users\Admin\n8n-files\Star Comprehensive Insuran
 - Options:** A 'Download' button is visible.
- Output:** Displays a table with one item. The table has two columns: 'data' (Star Comprehensive Insurance Brochure.pdf) and 'File Name' (Star Comprehensive Insurance Brochure.pdf). The file size is listed as 267 kB.

The screenshot shows the Camunda 8.2.0 web console interface. The main area is divided into three panels: INPUT, PARAMETERS, and OUTPUT.

- INPUT Panel:** Shows the 'Read/Write Files from Disk' connector with 1 item. The file details are:
 - File Name: Star Comprehensive Insurance Brochure.pdf
 - Directory: C:/Users/Admin/n8n-files
 - File Extension: pdf
 - Mime Type: application/pdf
 - File Size: 267 KB
 A 'Download' button is visible at the bottom.
- PARAMETERS Panel:** The 'Parameters' tab is selected. It shows:
 - Operation: Extract From PDF
 - Input Binary Field: data
 - Description: The name of the input binary field containing the file to be extracted
 - Options: A section with a '+ Add option' button.
- OUTPUT Panel:** Shows the output of the step as a JSON object:

```
{
  "numpages": 2,
  "numrender": 2,
  "info": {
    "PDFFormatVersion": 1.7,
    "Language": null,
    "EncryptFilterName": null,
    "IsLinearized": true,
    "IsAcroFormPresent": false,
    "IsXFAPresent": false,
    "IsCollectionPresent": false,
    "IsSignaturesPresent": false,
    "Author": "product",
    "CreationDate": "D:20170714123814+05'30'",
    "Creator": "CorelDRAW X8"
  }
}
```

The screenshot displays the 'Basic LLM Chain' interface in a web browser. The interface is organized into three main panels: INPUT, PARAMETERS, and OUTPUT.

- INPUT Panel:** Contains a configuration for 'Extract from File'. It includes fields for 'numpages' (2) and 'numrender' (2). Below these is an 'info' section with various settings:
 - PDFFormatVersion: 1.7
 - Language: [null]
 - EncryptFilterName: [null]
 - IsLinearized: true
 - IsAcroFormPresent: false
 - IsXFAPresent: false
 - IsCollectionPresent: false
 - IsSignaturesPresent: false
 - Author: product
 - CreationDate: D:20170714123814+05'30'
 - Creator: CorelDRAW X8
- PARAMETERS Panel:** Features tabs for 'Schema', 'Table', and 'JSON', with 'Parameters' currently selected. It includes an 'Execute step' button. The 'Source for Prompt (User Message)' is set to 'Define below'. The 'Prompt (User Message)' text area contains a system prompt and a user message. The system prompt is: 'You are a highly accurate Document Question Answering (QA) agent. Your sole purpose is to analyze the provided document text and answer the user's questions {{ \$('When chat message received').item.json.chatInput }} based exclusively on that content.' The user message is: 'You are a highly accurate Document Question Answering (QA) agent. Your sole purpose is to analyze the provided document text and answer the user's questions {{ \$('When chat message received').item.json.chatInput }} based exclusively on that content.' There are checkboxes for 'Require Specific Output Format' and 'Enable Fallback Model', both of which are currently unchecked. A 'Chat Messages (if Using a Chat Model)' section with an 'Add prompt' button is also visible.
- OUTPUT Panel:** Shows the result of the execution. It includes a 'text' output field with a large block of text, including a table of charges and a source note. The table lists various charges and their amounts, such as 'Room-rent (Room, Boarding & Nursing) charges - Single Standard A/C' and 'Sum Insured (SI) Room-rent charge (per admission)'. The source note states: 'Source: *Room, Boarding and Nursing charges ... 5 lacs 7.5 lacs 10 lacs 15 lacs 20 lacs 25 lacs Single Standard A/C (as shown in the schedule of benefits).'

Prompt User message:

You are a highly accurate Document Question Answering (QA) agent. Your sole purpose is to analyze the provided document text and answer the user's questions {{ \$('When chat message received').item.json.chatInput }} based exclusively on that content.

Strict Operating Rules:

1. Information Source: Base your answers ONLY on the text provided within the DOCUMENT {{ \$json.text }} tags below. Absolutely do not use outside knowledge, general assumptions, or prior training data to answer the query or fill in gaps.
2. Missing Information: If the document does not contain the answer, or lacks sufficient context to fully address the user's query, you must state exactly: "The provided document does not contain information to answer this question." Do not guess, infer, or attempt to be helpful by inventing an answer.
3. Tone and Style: Be concise, direct, and professional. Quote the document directly when it provides clarity, but ensure the final response is easy to read.
4. Context Awareness: Use the conversation history to understand follow-up questions, but always ground the final answer strictly in the document text.
