Home Assignment:

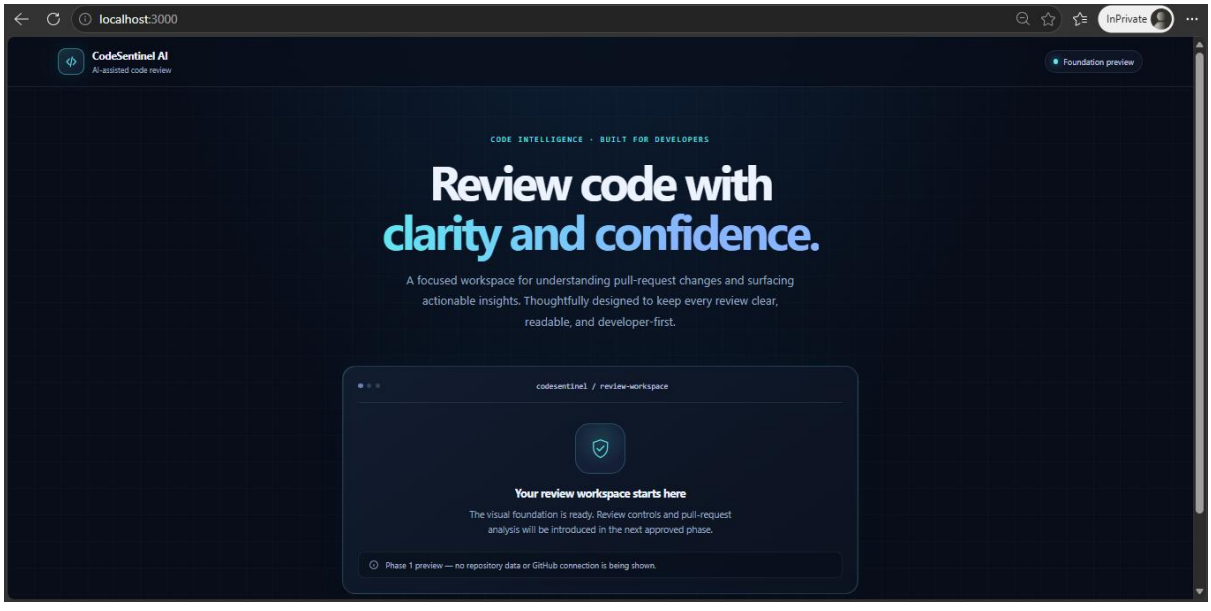

GitHub Code Reviewer Agent with Custom UI

Using the User Story Reviewer workflow and UI files as a reference, build a custom UI for the existing GitHub Code Reviewer Agent.

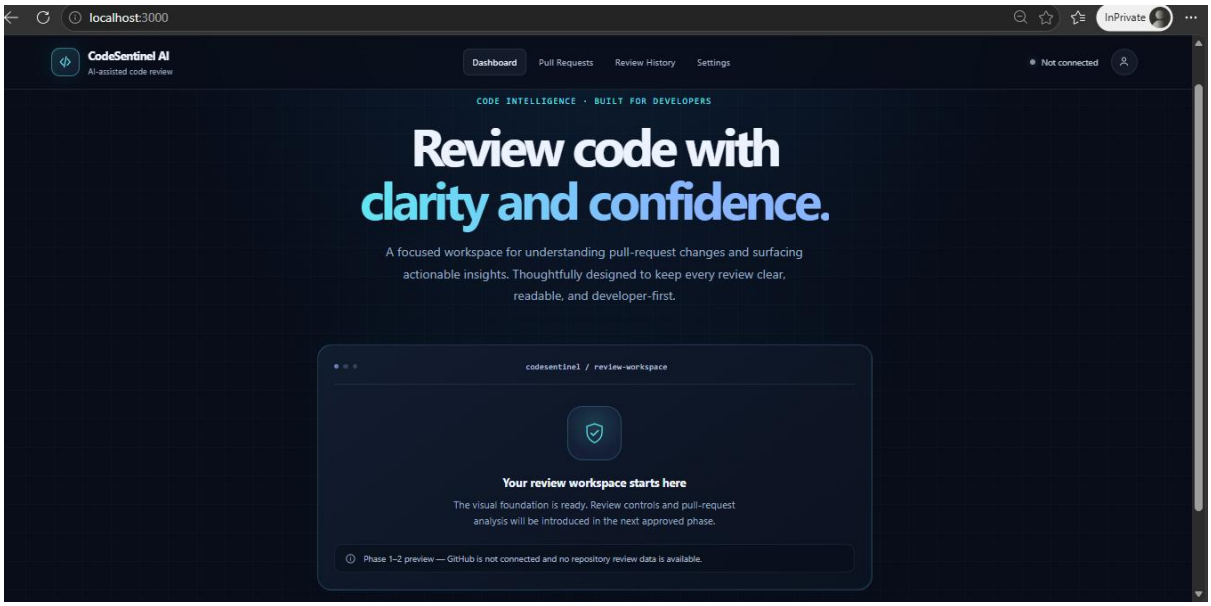

N8n Work flow:

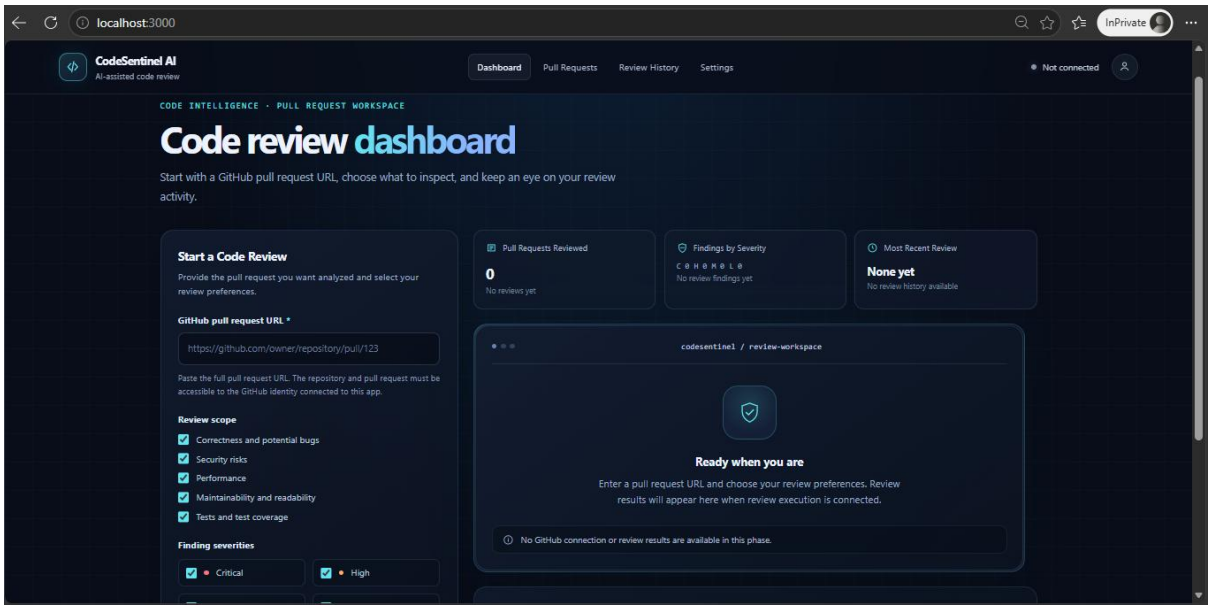

Phase 1:

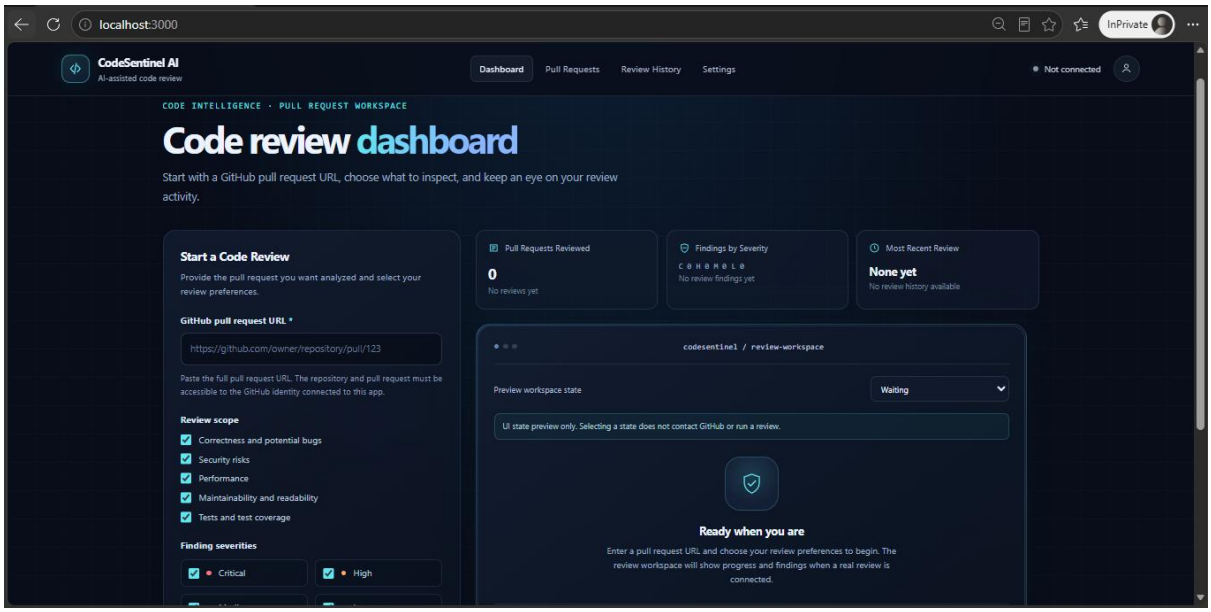

Phase 2:

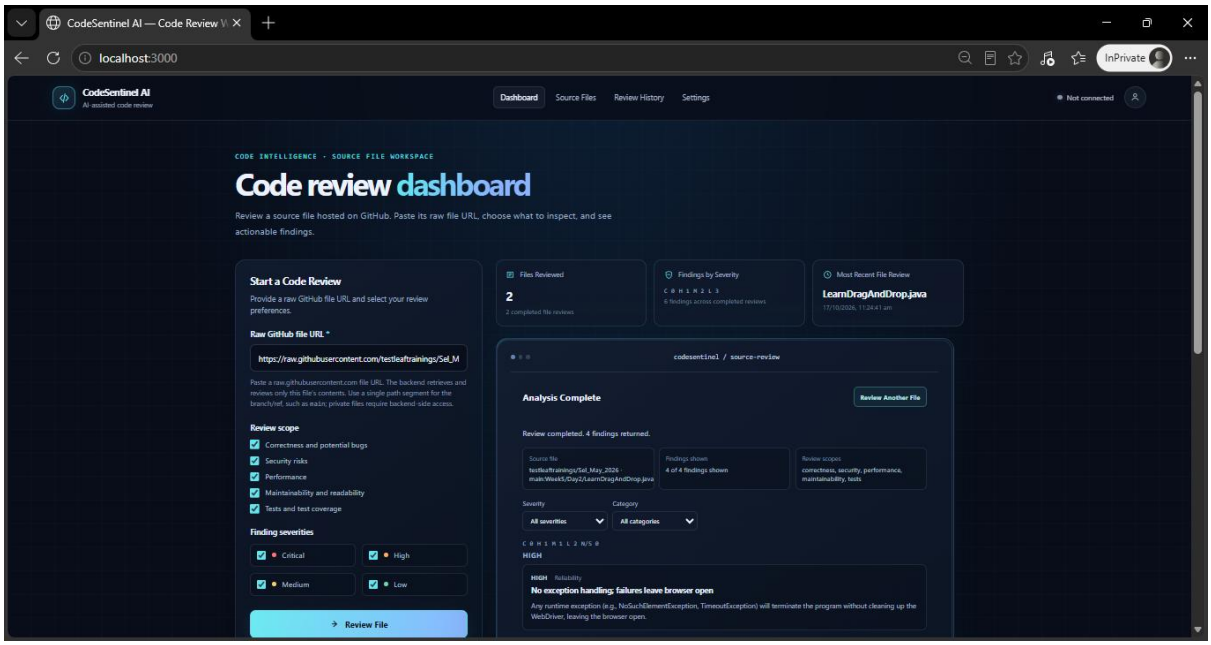

Phase 3:

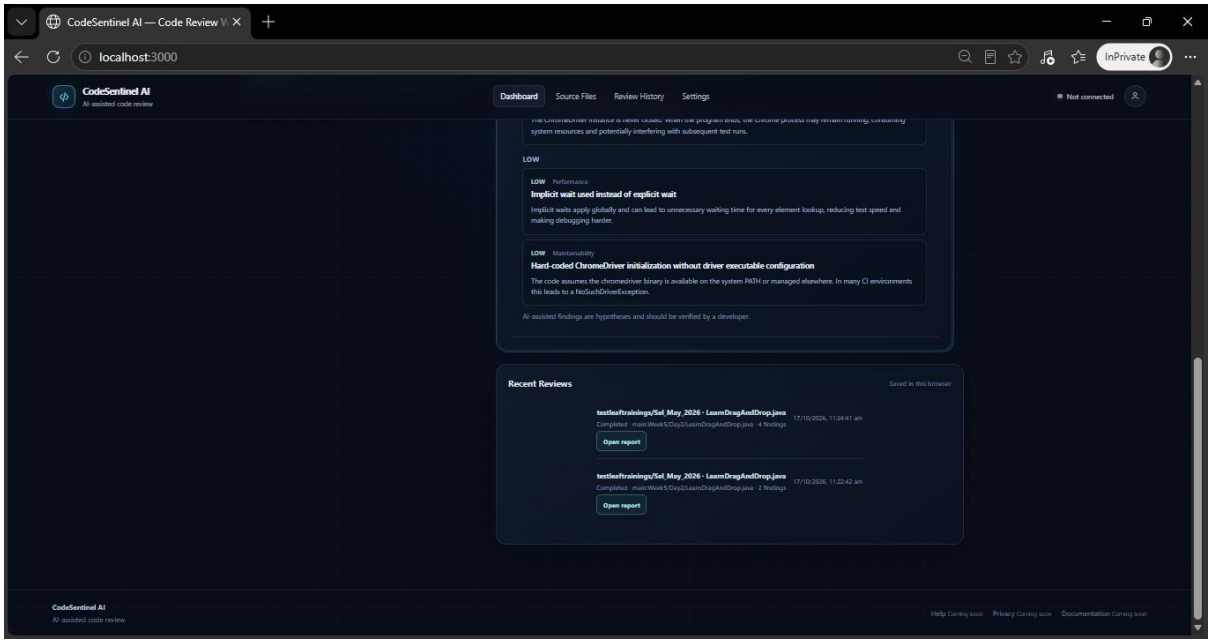

Phase 4:

Phase 5 & 6 implementation:

Settings
Not connected
system resources and potentially interfering with subsequent test runs.
LOW
LOW Performance
Implicit wait used instead of explicit wait
Implicit waits apply globally and can lead to unnecessary waiting time for every element lookup, reducing test speed and making debugging harder.
LOW Maintainability
Hard-coded ChromeDriver initialization without driver executable configuration
The code assumes the chromedriver binary is available on the system PATH or managed elsewhere. In many CI environments this leads to a NoSuchDriverException.
AI-assisted findings are hypotheses and should be verified by a developer.
