

Week – 3 – Day -2: Home Assignment

JIRA integration with Test Case Generator AI and Extracting the User Stories

The screenshot shows a web application titled "User Story to Tests" with a subtitle "Turn user stories into comprehensive, structured test cases in seconds." The interface is divided into two main sections. On the left, the "Jira connection" section shows a "Connected" status and fields for "Import stories from your SCRUM project" with values: "https://manojprabhakarofficial27.atlassian.net" and "manojprabhakarofficial27@gmail.com". Below these is a "Refresh Jira stories" button. The "Story Title" field is empty. On the right, the "Jira user stories" section lists four stories: "SCRUM-29 Employee Profile Employee Self", "SCRUM-28 Ahc Reports Reports Ahc", "SCRUM-27 Secretary Dashboard Doctor Calendar", and "SCRUM-26 Masters Others Approval Setup". All stories have a status of "To Do".

Selecting specific WI:

Details populated

Also summary button added:

The screenshot shows the same web application, but now the "Story Title" field is populated with "SCRUM-25: Employee Profile Basic Details". The "Description" field contains the text: "As a user, I want to employee profile basic details so that the related functionality works as expected." The "Summary" field contains the text: "Employee Profile Basic Details". The "Acceptance Criteria" field contains the text: "Given the system is operational, when the user performs the intended action, then the system should respond accurately and meet functional expectations." The "Jira user stories" list on the right now shows "SCRUM-27 Secretary Dashboard Doctor Calendar", "SCRUM-26 Masters Others Approval Setup", "SCRUM-25 Employee Profile Basic Details" (highlighted), and "SCRUM-24 Doctor Dashboard Op Dashboard". All stories have a status of "To Do". A new "Summary" button has been added to the left sidebar.

Clicked on Generate Test cases, created the TC's
